

WIDEX CLEAR™ 220

STAY IN SYNC WITH LIFE

WIDEX WIRELESS FOR BOTH YOUR EARS

NOW IS **CLEARLY** THE TIME FOR **BETTER HEARING**

The new **CLEAR220** hearing aids from Widex are **WIRELESS!** Like two ears, they can communicate with each other constantly.

All the functions in **CLEAR220** hearing aids are adjusted instantly and automatically depending on your listening environment. From soft sounds to louder sounds, you can hear clearly.

When combined with a unique range of **DEX** wireless accessories, **CLEAR220** makes hearing in different listening situations – such as watching television, listening to music or using your cell phone – easier.

CLEAR220 is a clear choice and an excellent value.

HEARING AID MODELS AND COLORS

The WIDEX CLEAR220 series is available in a range of Behind-The-Ear models and In-The-Ear models.

Your hearing care professional can help you choose the right hearing aid model for your specific loss.

All Behind-The-Ear models are available in our six standard colors.

Standard colors		Warm beige		Midnight black
		Tan silk		Titan grey
		Cappuccino brown		Winter silver

And two of our Behind-The-Ear models come in an additional eight fantastic colors!

Additional colors		Summer gold		Shocking pink
		Copper brown		Lime green
		Pearl white		Sporty red
		Metallic blue		Mediterranean turquoise

WHAT'S IN IT FOR YOU?

Exceptional **CLEAR220** BENEFITS Include:

- More natural sound quality
- Listening comfort in quiet and in noise
- Optional InterEar™ ZEN Program for relaxation and tinnitus management
- Hearing high pitch sounds through the unique Audibility Extender
- Helps stop hearing aid whistling
- Automatic Performance
- 5 channel High Definition Locator Microphone that automatically adjusts to help you hear and understand better
- TV-DEX with EchoFree Technology to offer excellent TV listening
- M-DEX for direct connectivity between cell phones and **CLEAR220** hearing aids
- Virtually invisible sized models available
- Open Fit models allow you to avoid a plugged up feeling and enjoy the natural sound of your own voice
- SmartSpeak uses recorded speech or tones to tell you exactly what program you are in, or whether your battery is low

Indications for Use: The ZEN Program is intended to provide a relaxing sound background for adults (21 years and older) who desire to listen to such a background in quiet. It may be used as a sound therapy tool in a tinnitus treatment program that is prescribed by a licensed hearing healthcare professional (audiologists, hearing aid specialists, otolaryngologists) who is trained in tinnitus management.

FREEDOM OF CHOICE

A CLEAR connection to what matters most

A particular challenge for hearing aid users is distinguishing between speech and noise. Moving from one sound environment to another during the course of a busy day, you constantly come into contact with differing levels of noise – and from soft sounds to loud sounds.

CLEAR220 helps you hear better in these challenging situations.

And it can also help you locate sounds from the front or back.

Staying in sync

Because **CLEAR220** hearing aids are communicating with each other, and because they do it instantaneously, changes you make to the volume or program shift in one hearing aid is replicated in the other.

So access to more natural sound could not be easier.

CLEAR220 is available in a variety of models - including a virtually invisible model.

ENHANCE YOUR EXPERIENCE WITH THE **COMPLETE** HEARING **SOLUTION**

When you combine **CLEAR220** with Widex's DEX assistive listening devices, you can enjoy watching television, listening to music or using your cell phone – all completely wirelessly.

With the TV-DEX, high-quality stereo sound goes from your television (or music player) directly to your hearing aids. There is no delay or echo and you can enjoy uninterrupted sound for up to 10 hours between recharging the battery.

You can also temporarily switch the hearing aid's microphone off and hear the TV sound only – so you can enjoy your favorite TV program without unnecessary background noise.

With the M-DEX, you can connect directly with cell phones. So you can talk and hear cell phone conversations directly in **CLEAR220** hearing aids.

And perhaps the best thing about the M-DEX is a unique feature that allows you to turn the hearing aid's microphones off temporarily – so you can concentrate on your conversation without being disturbed by surrounding sounds.

The RC-DEX is a simple to use remote control that lets you easily control hearing aid functions – such as volume and listening programs.

The RC-DEX is small enough to fit on a key ring.

WIDEX CLEAR™ 220

STAY IN SYNC WITH LIFE

AT WIDEX WE KNOW THAT HEARING LOSS IS COMPLICATED. EVERY CASE IS **INDIVIDUAL**; EVERY SOLUTION **UNIQUE**.
